DETAILED ACTION

Election/Restrictions

Applicant's election of Species I in the reply filed on January 23, 2006 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claims 7, 15-17 and 19 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on January 23, 2006.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5, 11, 14, 18, 20, 21, and 27-29 rejected under 35 U.S.C. 102(b) as being anticipated by Capper et al US Patent 6,267,787 B1.

Capper et al discloses a prosthetic device comprising a body (20), an axial hole (28) between a first surface and a second surface, a locking mechanism (80) having a central axis (82), a pawl (86), an attachment pin (60), a one-way clutch (see col. 5, lines 46-58), a ratchet (90 and/or 92), a release button (100), an undercut (see Fig. 4) and a compression spring (102).

Regarding claims 2-4, see figs. 3-4.

Regarding claim 11, see col. 3, lines 40-46.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 10 is rejected under 35 U.S.C. 103(a) as being unpatentable over Capper et al US Patent 6,267,787 B1.

Capper et al discloses the invention substantially as claimed. However, Capper et al does not disclose a body formed from a plastic material.

Capper et al discloses the claimed invention except for a body formed from a plastic material. It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the material property of the Capper et al reference, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin*, 125 USPQ 416.

Allowable Subject Matter

Claims 6, 8, 9, 12, 13, and 22-26 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
